Q: I read about the new Virtual Boy in the September issue. I noticed it takes six AA batteries that last only six hours. Batteries are expensive. Is Nintendo planning to make an AC adapter?

Daniel Fulcher
Cary, NC

Virtual wallet

A: **A spokesperson from Golin-Harris (Nintendo's PR firm) replies:**
There is an AC adapter for the Virtual Boy, which is available at local retail toy stores (like Toys 'R' Us). The suggested retail price is $19.95.
